Henri Kinnunen

CEO of WOIMA CORPORATION

Woima Corporation: Waste to Energy Power Plant Manufacture and Implementation

Woima is a Finnish modular waste to energy power plant supplier with the aim to mitigate waste-related problems in emerging countries.

Waste is a megatrend globally from which the amount of Municipal Solid Waste totals 3 Btons/year with 10% annual growth. Our solution for Capitalization of the megatrend is to deliver a pre-fabricated container-sized W2E Power Plant by WOIMA team with the past experience of project deliveries to 107 countries.

We offer a solution with proven technology that simultaneously

- * Significantly reduces waste landfilling
- * Delivers a variety energy commodities
- * Cuts down waste logistics costs

wasteWOIMA Power Plant will enable sustainable growth to all stakeholders such as:

- * Waste management companies
- * Energy sector
- * Funds
- * Investors
- * Local population

Woima has valid agency agreement with WITECH to support our customers in Sub-Saharan Africa, Bulgaria, Ukraine and in France. We started our collaboration in 2017 and do have a healthy pipeline of projects at sight.

We have a unique mix of know-how and solutions to fit these markets with our modular wasteWOIMA Power Plant and extensive experience from EPC projects globally.
